Class 13

Gen Dantay (BIMM 143)

#Patway Analysis with R and Bioconductor

We will use the GAGE package (Generally Applicable Gene set Enrichment), to do KEGG pathway enrichment analysis on RNA-seq based differential expression results.

Section 1: Differential Expression Analysis

We will use DESeq2 from last class!

Section 2. Pathway Analysis

We will use the GAGE package for pathway analysis and the pathview package to draw pathway diagrams.

The package we will use:

```
library(pathview)
```

Pathview is an open source software package distributed under GNU General Public License version 3 (GPLv3). Details of GPLv3 is available at http://www.gnu.org/licenses/gpl-3.0.html. Particullary, users are required to formally cite the original Pathview paper (not just mention it) in publications or products. For details, do citation("pathview") within R.

The pathview downloads and uses KEGG data. Non-academic uses may require a KEGG
